VesCo SOLUTIONS

Your connectivity partner

Why?

To create and manufacture products through more transparent and efficient processes, taking global technology trends into account and understanding the challenges companies face in local markets.

How?

VesCo Solutions is an authorized distributor of components and equipment for the Industrial IoT market. We support your company's needs comprehensively through these services:

Authorized Distribution

Complete BOM Sourcing

Engineering Services & Contract Manufacturing

Freight Forwarding & Logistics

What?

We deliver off-the-shelf or customized IoT solutions to solve problems and maximize our customers' productivity. We provide support from our location in Louisville, Kentucky, United States, with an office in Brazil, in Curitiba, Paraná. We are also equipped to meet your company's needs globally.

FAQs

Who are your authorized vendors?

Our authorized manufacturers are global influencers of the Industrial IoT market. We have selectively chosen them for their competitive pricing, quality standards, and commitment to innovation.

Where do I start?

Whether you are upgrading your current infrastructure or implementing a new system, VesCo Solutions will facilitate your operations. Our engagement can begin with a phone call or an in-person consultation to gather your company's initial requirements. We then follow with a meeting outlining strategy suggestions aligned with our products and vendors.

Authorized Distribution

VesCo has relationships and agreements with manufacturers that allow us to offer solutions across different areas of the topology of a technology ecosystem. We offer solutions for data capture through sensors or vision, with connectivity for remote control, and with that processed data made available in friendly, customizable interfaces.
